

PANVENEDUX

Marketing Campaign Briefing

Google Ads & GA4 Setup — What's Done & What You Need to Do

September 2026

SECTION 1: WHAT HAS BEEN COMPLETED (by the technical team)

1. Website Tracking Setup

- GA4 tag (G-FSSMM2HVX2) installed on all 6 pages: index, about, services, contact, consulting, london
- Events tracked automatically: form_submit, email_click, phone_click, generate_lead (Calendly clicks)
- Thank-you page (panvenedux.com/thank-you.html) fires generate_lead event when contact form is submitted
- Contact form redirects to thank-you page on successful submission (via Formspree)

2. Google Ads Conversion Tracking

- form_submit imported from GA4 into Google Ads as PRIMARY conversion action
- Category: Registration
- Connected to GA4 property: Panvenedux (483134384)
- Status: Active

3. Website Content

- Exploration call CTA added to consulting.html and london.html
- Privacy Policy + Cookie Policy combined into one tabbed page (panvenedux.com/privacy.html)
- All pages have mobile-responsive navigation

SECTION 2: WHAT THE MARKETING TEAM NEEDS TO DO

TASK 1: Turn Off Search Partners

Why: Search Partners (non-Google sites) often produce low-quality clicks and waste budget.

How:

1. Go to Google Ads → Campaigns
2. Click on your campaign name
3. Click "Settings" tab
4. Scroll to "Networks"
5. UNCHECK "Include Google search partners"
6. Save

TASK 2: Fix Location Targeting

Why: Ads must show ONLY in Bulgaria, United Kingdom, and Texas (USA) — not globally.

How:

1. Go to Google Ads → Campaigns → Settings
2. Scroll to "Locations"
3. Remove any broad locations (e.g. "All countries")
4. Add: Bulgaria / United Kingdom / Texas, United States
5. Set targeting to "People in or regularly in these locations"
6. Save

TASK 3: Add Negative Keywords

Why: Negative keywords stop your ads from showing for irrelevant searches (e.g. "free", "jobs", "DIY").

How:

1. Go to Google Ads → Campaigns → Keywords → Negative keywords
2. Click "+ New negative keyword list" or add directly
3. Add these negative keywords: free, cheap, jobs, career, template, DIY, how to, course, training, salary, internship
4. Save

TASK 4: Relaunch the Campaign

Why: Campaign is currently PAUSED. Only relaunch AFTER Tasks 1, 2, 3 are complete.

How:

1. Go to Google Ads → Campaigns
2. Find your paused campaign
3. Click the pause icon → change to "Enabled"
4. Monitor daily for the first week — check impressions, clicks, conversions
5. Budget: ~300 EUR/month per market (Bulgaria, UK, Texas)

SECTION 3: MONITORING — WHAT TO CHECK WEEKLY

In Google Ads:

- Impressions: Are people seeing the ads?
- Click-through rate (CTR): Should be above 2%
- Conversions: form_submit events = people who sent a contact form
- Cost per conversion: Aim for under 50 EUR

In GA4 (analytics.google.com):

- Go to Reports → Engagement → Events
- Look for: form_submit, generate_lead, email_click
- These show how users interact with the site

For technical questions about tracking or the website, contact the development team.
